Play areas

- We at Wilmot's are particularly proud of our investment in fun, challenging outdoor play equipment.
- All play areas are fitted with a wide range of safe, modern and age appropriate activities.
- Separate all weather external play areas are in place for the different age groups, ensuring optimal safety for all of the children, whilst not restricting the more active play of the older children.
- Recognising our mixed climate, part of the external play area is covered, so that the children can play outdoors on wet days.
- In addition, we have an indoor playroom - the "fun room"

Promoting a healthy lifestyle

- Wilmot's actively promotes healthy eating habits by providing a varied menu of nutritious, hot meals from its restaurant quality kitchen, using locally sourced ingredients.
- All catering and senior staff are trained in HACCP food hygiene regulations.
- Our menus have been designed by a professional nutritionist and approved by a dietician from the HSE, ensuring the highest standards.
- We have regular food hygiene audits by an independent consultant.

Baby sleep areas

- All rooms are climate controlled and particle filtered for optimal comfort and hygiene.
- Ambient temperatures are monitored using specialist equipment to ensure the indoor environment is maintained within the recommended ranges.
- Sleeping areas are also fitted with electronically controlled air changing systems, with air changes well in excess of the recommended three times per hour, providing safety and comfort for the sleeping babies and promoting good health.
- Babies enjoy their slumber in cots, while toddlers take their naps in toddler beds. All bed linen is freshly laundered.
